

We offer custom manufacturing and industrial parts repair to both regional and national industries.

Since opening as a crank shaft repair shop in 1948, we have consistently expanded our capabilities.

Today our facility has some of the most specialized equipment the industry offers and our experienced journeymen work force enables us to offer unparalleled services. We can design and manufacture new components to meet your specific requirements as well as repair and rebuild existing parts to "like new" condition.

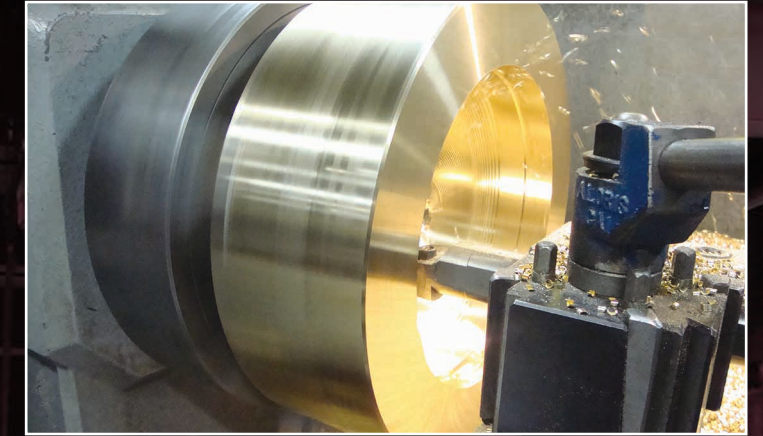

Industrial Hard Chrome Plating

Precision has chrome plating tanks in continuous operation. All of which utilize a high speed catalyst plating process providing a harder, smoother, brighter and more durable chrome surface than conventional chromic baths.

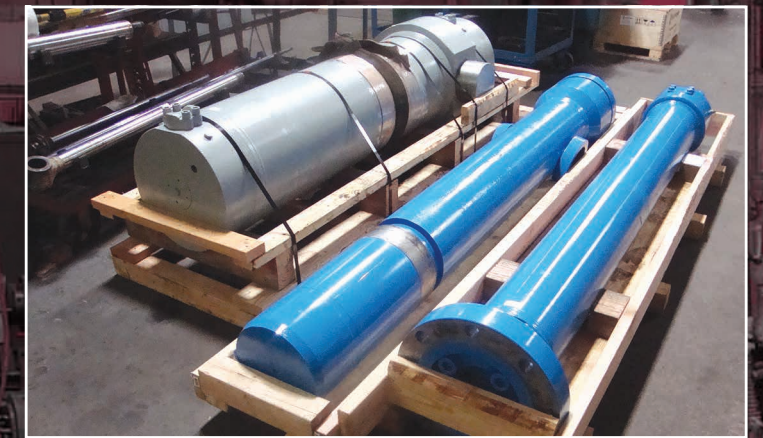

Our plating process can be operated at higher current densities plating at rates twice those of conventional baths. This capability enables us to provide you with a much faster service while still maintaining the highest quality.

Chrome plating in strict accordance with Quality Control Standard QQC-320B or AMS-2460 upon request.

CNC & Conventional Machining

- CNC turning and boring
- Conventional machining
- Cylindrical ID and OD grinding
- Honing, lapping and specialty welding.
- Holding tolerances of .0002"

Hydraulic Cylinders

PEI designs and manufactures cylinders for numerous industries. Repairing all brands of cylinders of any size is an ongoing process for us. We're known as the telescopic cylinder repair specialists in the northwest.

25,000 SqFt Industrial Manufacturing & Repair Facility

- General Machine Shop Services
- CNC & Conventional Machining
- Industrial Hard Chrome Plating
- Cylindrical ID & OD Grinding
- Bearing Spindle Reconditioning
- Roll Manufacturing
- Hydraulic Cylinder Repair
- Design and Manufacture
- Hydroelectric Manufacture & Repair
- Engineering Services
- Specialty Welding
- SUBSAFE/Level 1 Qualified Manufacturer

We pride ourselves on our great customer service and dedication to quality. Give us a ring and we'll talk about your project and what Precision Equipment can do for you.
